

BARBADOS PUBLIC WORKERS' CO-OPERATIVE CREDIT UNION LIMITED

Notes to the Consolidated Financial Statements

For the year ended March 31, 2019

(Expressed in Barbados dollars)

26. Financial Risk Management, continued

26.3 Liquidity risk and funding management

Liquidity risk is defined as the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Group might be unable to meet its payment obligations when they fall due under both normal and stressed circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, and adopted a policy of managing assets with liquidity in mind and of monitoring future cash flows and liquidity on a daily basis. The Group has developed internal control processes and contingency plans for managing liquidity risk. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The Group maintains a portfolio of highly marketable and diverse assets that are assumed to be easily liquidated in the event of an unforeseen interruption of cash flow. The Group also has committed lines of credit that it can access to meet liquidity needs. In addition, the Group maintains a statutory deposit with the Central Bank of Barbados.

Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the undiscounted cash flows of the Group's financial liabilities as of March 31, 2019 and March 31, 2018 on the basis of their earliest possible contractual maturity.
